Aerocow | Fuel Stabilizer

Stops Downdrafts - Saves Fuel

Aerocowl

Aerocowl is an aerodynamically designed unit which, when fitted to structurally sound chimneys and flues, completely eliminates down-draft preventing troublesome smoke and toxic fumes from circulating within the home. Aerocowl's built-in bleeding system reduces excessive fuel burning for all types of heating appliances whether solid fuel, oil, gas or wood-burning, resulting in significant savings in energy consumption.

Saves Fuel - Saves Money

Preliminary tests recorded a minimum saving of 12% after fitting an Aerocowl with up to 30% recorded in certain cases.

Easily Installed

Available in three sizes, to fit all domestic chimneys and flues. Installation is simplicity itself. Just locate on chimney, and secure.

Doubles as a Rain Cap

Prevents rain, snow or sleet entering the chimney or flue.

Reduces Condensation

Aerocowl reduces condensation and improves ventilation.

Aesthetically Pleasing

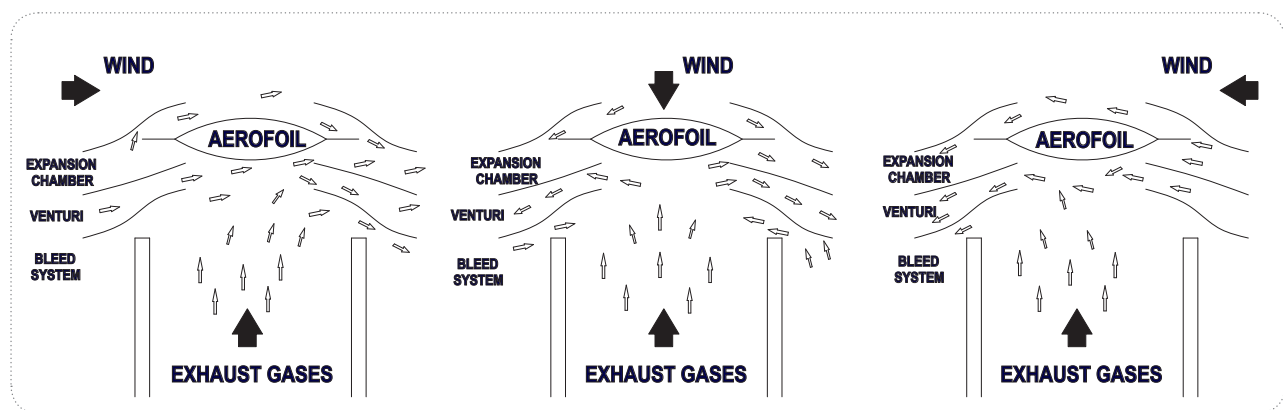

The aerodynamically designed Aerocowl blends in naturally with its surrounding.

Long Life

The results of the Comprehensive Accelerated Corrosion Tests revealed an average life expectancy of 12 years for Aerocowl.

International Acclaim

Aerocowl is now marketed successfully in 14 countries throughout the world and has won major international awards.
